INVITATION

The Department of Experimental Medicine & Biotechnology, PGIMER, Chandigarh is inaugurating a state of art small animal facility with a provision to develop gene knockout and transgenic animal model systems for various human diseases. This facility will be a shot in the arm to initiate experimental pathophysiological work and will greatly boost the research work of the institute. On this occasion the department is organising a one day symposium entitled "Animal Remodeling: From Laboratory to Clinic". Speakers from prestigious institutes throughout the country will share their experiences on model animal diets, small animal genomics, tailoring animal models for specific human diseases including models of injury & repair and preclinical drug trials. A "Brain Storming Session" is also included to satisfy the curiosities of novices in this field. The "Poster Session" is being organized to encourage the postgraduate students and residents with an award for the best poster. We extend you a cordial invitation to participate in this event of high academic relevance.
